

PREFACE

For an MSc student it is necessary to have some practical knowledge as well as the generic qualifications. It is extremely important to have an idea of what goes on in the industry before actually stepping into the industry and it helps the student to select the field of interest to pursue their career.

Tech Mahindra Ltd has provided that training ground for me. During this period I understood how NLP is used for the generation of MCQs . The objective was to experiment with various methods and come up with a way to generate the MCQs automatically for the given text through Machine Learning and Natural Language Processing Techniques.
