

## **PREFACE**

The project Prediction of an election, who a voter will vote aims at optimizing and enhancing the analytic processed by using various technologies and methodologies. I have been allowed to work at DHL Supply Chain, From 1<sup>st</sup> February 2022 to 22<sup>nd</sup> March 2022.

DHL Supply Chain is the world's leading contract logistics provider head quartered in Bonn, Germany. I have worked on google colab for analysis purpose. My skillsets include Machine learning, Data visualization. Most of my work was done using open-source tools.

I was given an election dataset to explore and analyse the data. I got to work on google colab to integrate python language for the entire period of my project. I have worked on packages like pandas, numpy, matplotlib, seaborn and sk-learn and also learned about modelling dataset along with the required line of work.
