

Preface

This preface aims to introduce the Hand Gesture Controlled Home Automation System designed specifically for individuals with disabilities. In a world where technology plays a vital role in improving the quality of life, this innovative system leverages hand gestures as an intuitive and accessible interface for controlling various aspects of a home. By eliminating the need for physical buttons or switches, it empowers disabled individuals to effortlessly manage their living environment. This preface sets the stage for exploring the profound impact of this system, highlighting its potential to enhance independence, convenience, and overall well-being for people with disabilities.
